

Sustainable mobility

Electrified Mobility

Connected Mobility

IC powertrains

Reducing CO₂ and pollutant emissions, diversifying energy sources and incorporating the evolution in transport modes: these are the challenges associated with sustainable mobility for industry.

IFPEN channels its expertise into addressing this triple challenge, **within the framework of the IFPEN Transports Energie Carnot Institute.**

Its technological offer is structured around three complementary priority areas:

- Electrified Mobility
- Batteries
- Connected mobility
- IC powertrains

Sustainable mobility
