Issues and Foresight

18 November 2021

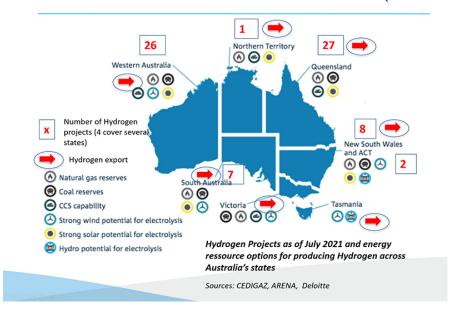

Novembre 18, will take the Renewable Gas Webinar organized by Cedigaz.

The rising role of hydrogen in the energy transition and the emergence of international supply chains will be debated, with a focus on the growing pipeline of hydrogen projects around the world and the specific role of Australia as a frontrunner in building international supply chains.

Informations and registration: https://webinar.cedigaz.org/

Australia has big hydrogen opportunity

Clean Hydrogen at scale : To be launched soon ? The case of Australia 08 November 2021
