Microfluidics

13 - 15 November 2024

IFPEN is pleased to announce the 3rd International symposium on Microfluidics 2024: using microfluidics to meet energy and environmental challenges

13-15 November 2024

Extended deadline for the call for abstracts: send your abstracts before 30 June!

Abstract submission

www.rs-microfluidics.com

μ FLUIDICS

SAVE THE DATE

13 - 15 November 2024
Rueil-Malmaison - France

3rd International symposium

ifpen
Les rencontres
scientifiques

Energy production, recovery & storage : Identifying and understanding limiting phenomena

Batteries

H₂
Salinity gradient
etc.

Industry decarbonization

CO₂ storage

H₂
Process optimization/intensification
Energy efficiency
etc.

Water resources management

Pollutant identification

Water pollution remediation
Water quality monitoring (Urban and industrial networks)
etc.

Topics: microfluidics for understanding and microfluidics as tools/sensors
Tools: HP-HT, sensors, analysis, on-board sensors (latent heat, piezo, etc.)
Understanding

Drawing inspiration from the living world via bio and geomimicry to solve these challenges!

Microfluidics 2024 : meeting energy and environmental challenges
23 May 2024
