

IFPEN, a French public research establishment, is at the crossroads of fundamental research, innovation and industrialization, working to support the energy and ecological transition.

On the strength of its position, IFPEN has the credentials to actively contribute to European-level public debates in its fields of expertise, particularly in the following areas:

- the structuring of European research and its principal funding instruments
- decarbonization policies and the solutions to be deployed to foster the emergence of a sustainable economy

To this end, **IFPEN is positioned across a broad range of themes.**

European funding dedicated to research and innovation (FP10)

IFPEN details a set of strategic recommendations concerning the preparation of the upcoming FP10. This position paper highlights its vision for shaping the future of research and innovation in Europe.

IFPEN POSITION PAPER

10th FRAMEWORK PROGRAM FOR
RESEARCH AND INNOVATION

Innovating for a low-carbon and sustainable world

June 2024
