

IFPEN's expertise and skills are **key influence and appeal factors** when it comes to conducting open and collaborative research. Peer recognition in a **variety of fields**, reflected in the numerous, often prestigious **awards received** over the years, is thus essential.

Awards and accolades obtained in 2025

Raquel Franco Martinez, engineer of the Catalysis, Biocatalysis and Separation unit received the 2024 young researcher prize from the French zeolite group (GFZ) for her innovative work in the field of catalysis and biocatalysis. His research focuses on developing new methods for the synthesis and application of zeolites for more efficient energy and environmental solutions.
