11-12 december 2018

IFPEN, Rueil-Malmaison (near Paris) - France

LES4ICE aims at providing a **forum of international exchanges** concerning recent advances in **Large-Eddy Simulation** research applied to **Internal Combustion Engine Flows** and related experimental techniques.

It brings together **engine designers and research scientists** working in the field of ICE to debate the state of the art in LES applied to ICEs and examine advanced experimental techniques capable of supporting and validating its development.
