

Responsible oil and gas	Fuels	Petrochemicals	Gas treatment
Basins and reservoirs modeling and simulation	Enhanced oil recovery (EOR)	Risers and flow lines	

Against the backdrop of the accelerating energy transition, the oil industry and related sectors need to continue to meet sustained demand, while significantly reducing their environmental footprint and energy consumption. IFPEN develops eco-efficient and flexible processes for the production of fuel and chemical intermediates meeting the strictest standards. To make better use of reserves, IFPEN also proposes increasingly efficient and cleaner, cutting-edge technologies for oil and gas exploration and production.
