

Sustainable mobility

Connected Mobility

CONNECTED MOBILITY

OUR STRENGTHS

A team of more than 35 people and recognized Data Science expertise.

A dedicated subsidiary: [DriveQuant](#), specialized in driving analysis web services.

A stake in the start-up La Compagnie des Mobilités to support the development of the [Geovelo app](#).

A platform collecting web services developed by Carnot IFPEN Transports Energie and related to mobility : [Mobicloud](#)

A set of data, algorithms and digital tools relating to air quality and connected mobility is accessible through some thirty operational web-services available to IFPEN's clients and partners.

A web solution – [xDash](#) – offering a dynamic presentation of our services:

- linking of IFPEN algorithms (eco-driving, estimation of vehicle fuel consumption and pollutants, etc.) with external data (weather, road traffic, etc.),
- production of visualization and steering dashboards,
- simulation models.
